SUMMARY

Generative AI Specialist & Data Scientist with 6+ years of experience in descriptive, prescriptive, and predictive analytics. Collaborated with R&D, Sales, Marketing, and Leadership teams to deliver data-driven insights and solve complex business problems. Proficient in Generative AI, NLP, Agentic AI, Milvus, Neo 4j and machine learning, leveraging LLMs, Lang Chain, Langraph and Azure AI for automation and decision-making. Certified in Generative AI, Deep Learning, ML and NLP.

PROFESSIONAL EXPERIENCE

KPMG India, Bengaluru

June 2025 - Present

Schneider Electric, Bengaluru, India

AI - Powered Order Handover Automation and Knowledge Retrieval Platform

Developed and Agentic AI system capable of processing multi-format data including Excel, PDFs, images, emails, and SLD diagrams to generate evidence-backed Yes/No/Not Available responses with reasoning, source references, and confidence scores using Hybrid RAG and intelligent retrievals.

Tools Used : Python, AWS Bedrock (Claude/Titan), Open Search vector search, OCR/document parsing, Pandas, prompt engineering, and workflow automation.

Walmart, Bengaluru, India

Multi-Metric AI Evaluation System

Created an evaluation system to measure accuracy, efficiency, fairness, and faithfulness of AI outputs. The system also evaluates ground truth alignment, bias, BLEU, F1 score, and overall response quality.

Tools Used : RAGAS, Ragevals, LangSmith, and GenAI evaluators

Buddy Agent — Intelligent User Assistance System

I created a Buddy Agent that guides users through the application and helps them understand its features. It also serves as a friendly companion to simplify and enhance their overall experience.

Tools Used : Gpt-5.1, Milvus, Neo4j, Azure app services

Tata Consultancy Services, Bengaluru, India

Dec 2022 - May 2022

Optimized Material Selection with Generative AI:

Leveraged Generative AI to streamline the material selection process during sourcing, resulting in a **70%** improvement in material performance, also helps reduction in material costs and enhancement in sustainability metrics.

Tools Used: Lang chain, Chroma DB, Gpt-4o.

FlowChartGPT – AI-Powered Flowchart Extraction & Chatbot Integration System

Developed an AI-driven chatbot that automatically extracts information from flowcharts, converts it into structured JSON, and integrates it with GPT models to deliver accurate, context-aware responses.

Chatbot with RAG Model for Large Documents Handling:

- Retrieval-Augmented Generation (RAG) model to efficiently process and respond to queries from large documents, such as 1000+ page PDFs.
- By integrating text retrieval with generative capabilities, the system enhanced response accuracy and context-awareness, achieving a **90%** improvement in query response time .

H-Point Variation Analysis for Enhanced CAE Crash Test Correlation:

- Analyzed variations in the mean H-point during crash tests, where actual ATD H-point deviated from the design H-point.
- Successfully estimated these variations, leading to improved correlation between CAE crash simulations and physical test results, enhancing the accuracy of crash worthiness predictions by **70%**

VHS Consultancy Services, Bengaluru, India

Nov 2021 - Nov 2022

Downstream Desalter Analysis – Predictive Modelling

- Build an end-to-end pipeline that models one of the **largest Multi-Stage Desalter** systems in North America, identifying key drivers of efficiency and recasting desalter efficiency.
- Helped detect evaporator problems **8X quicker**, leading to expected savings and business growth valued at **\$90M**.
- Developed interactive **Power BI dashboards** to visualize **KPIs, track desalter efficiency, and monitor operational trends**.

SimTech It Solutions Pvt Ltd, Bengaluru, India

Aug 2019 - Oct 2021

Pepsico

- The goal of this project was to thoroughly test an e-commerce website to ensure its functionality, security, and performance met the highest quality standards before release to customers.

EDUCATION

Bachelor of Engineering - B.E

CGPA : 8.0

Aug 2015 - May 2019

Builders Engineering College, Tamil Nadu.

TECHNICAL SKILLS

Machine Learning & Deep Learning: NumPy, Pandas, scikit-learn, Matplotlib, Classification, Regression, Clustering, XG Boost, Bagging, Time Series Forecasting, EDA, Statistics, Hypothesis Testing, ANN, RNN, LSTM, GRU Transformers, TensorFlow, Keras, PyTorch.

Generative AI & NLP: GAN, VAEs, Large Language Models (LLMs), GPT, Claude, Gemini, Hugging Face Models, NLP, RAG, AI Agents, MCP, Milvus, Neo4j, Framework like LangChain, LangGraph, Crew Ai, Fine-Tuning, Prompt Engineering, RAG Evaluation (Ragas, LangSmith, RAG Evals)

Cloud & Deployment Tools: Azure Databricks, Azure App Services, Azure AI Foundry, Amazon Web Services (S3, EC2, lambda), Docker, Fast API.

Visualization & Productivity Tools: Microsoft Power BI, MS Excel, Microsoft PowerPoint, KPI Dashboarding
